TNC Seminar Series Monthly Schedule

TNC team works to develop training and educational opportunities for the research community and promoting drug discovery for neurological disorders. The TNC offers a monthly seminar series from the leaders in translational neuroscience for physicians, medical students, clinical trial staff, principal laboratory investigators, and post-doctoral fellows.

See All >

*All speakers will be presenting virtually followed by a Q&A session. Calendar invites will be sent with each presentation title and zoom details before each month's seminar or posted online.
